

## Sustainability Statement

---

### CREATING SUSTAINABLE FUTURES

Seriously Clean LTD solutions are creating a chemical free future while promoting the importance of toxin-free cleaning for commercial and home use. Our hypochlorous acid solution offers a different parts per million (PPM) per product. Each individual use has a tested and proven PPM for the disinfectant, surface spray, vet line, hand and skin care products and 510K wound care line. The disinfectant is on the EPA-N list for use against SARS-Cov-2, the virus that causes COVID-19. Other kill claims include C-diff spores, MRSA, HIV, salmonella, Pseudomonas and Norovirus.

### SUSTAINABLE AND NON-TOXIC PRODUCTS

The Seriously Clean LTD process is simple; our raw materials are all natural. All raw ingredients sourced are natural, including salt and water, that is run through a proprietary electrolysis process creating molecular Oxygen and Hypochlorous Acid. Homes, businesses, restaurant groups, manufacturing facilities, offices, schools, hospitals, etc. can be cleaned and disinfected without toxic fumes, which would typically irritate skin, eyes and the respiratory system.

### REDUCING THE CARBON FOOTPRINT- ONE SOLUTION, MULTI-FACETED

The unique toxin-free, eco-friendly hypochlorous acid solution manufactured at Seriously Clean LTD requires no PPE. It is safe to use on and around skin, for water treatment sources, in large scale businesses, for animal use, and agriculture. Long term, this will eliminate the over production and overuse of unsafe chemical-based solutions. Hypochlorous acid is known as the body's own healing agent found in our white blood cells. Seriously Clean LTD as a company promotes health, sustainability, and secures a clean future.

### SUPPORTING THE CIRCULAR ECONOMY

Seriously Clean LTD manufacturing facility operates on electricity, eliminating the possibility of emitting harmful gasses into the atmosphere causing further pollution. Seriously Clean LTD aligns with having a social responsibility by manufacturing solutions that save lives by cleaning and disinfecting without toxic fumes. Our organization frequently sources rPET, which can be heated, melted, and transformed into new materials ongoing. Seriously Clean LTD does not operate fossil fuel intensive, which releases nitrogen oxides into the atmosphere contributing to the smog, acid rains and climate change.

Seriously Clean LTD supports our consumers' health by promoting the use of our hypochlorous acid solution daily on high touch areas. We look forward to working with you and contributing to your sustainability and toxin-free cleaning measures. The Seriously Clean LTD team prides themselves on client relationships and close working partnerships.
